

ENZYME FLOOR CLEANER

Product Properties

COLOR: Clear Green
 ODOR: Fresh
 pH: 8.5
 SPECIFIC GRAVITY: 1.01
 SOLUBILITY IN WATER: Complete
 DETERGENCY: Excellent

Description

This product is a revolutionary product that combines a powerful blend of bioactive enzymes and grease solubilizers. This product is designed for use on quarry tile, grout, ceramic tile, terrazzo, marble and concrete. When used for daily floor cleaning, the bioactive enzymes and grease solubilizers penetrate the pores of quarry tile and grout. It provides constant enzyme action during and after application to eat away at grease, oils and other organic material build up.

Features...Benefits

2 oz/gal Use Dilution..... Highly Economical
 Bioactive Enzymes..... No Harsh Caustics
 Concentrated Surfactants..... Unparalleled Cleaning Power
 Improves Traction..... Safer Work Environment
 Brightens Grout Lines..... Improved Sanitation Perception
 No Rinse Formula..... Labor Savings

Directions

For daily cleaning of quarry tile, terrazzo, marble or other porous flooring: dilute two ounces of product per gallon of warm water. Apply solution liberally onto floor surface with a mop and allow solution to stand on floor surface until solution penetrates soils. Agitate floor surface with mop. For heavily soiled areas use deck brush or machine scrub as needed. Mop up or squeegee excess solution toward floor drain. Discard mop water down drains to reduce grease build up and eliminate odors.
